### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,901,430 to Smith.

As concerns claim 1, a communication system for communicating business information from a first business to a second business, the system comprising: an instant messaging component configured to receive, as an instant message, a business information access request from the second business and generate an output based on the business information access request (column 3, lines 35-37); a data store storing business information corresponding to the business information access request (column 3, lines 37-39); and a data store accessing system accessing the data store based on the output from the instant messaging component (column 3, lines 39-41).

As concerns claim 2, the communication system of claim 1 wherein the instant messaging component is configured to generate, as an instant message, a response to the business information access request (column 3, lines 44-46).

Art Unit: 2151

As concerns claim 3, the communication system of claim 2 wherein the business information access request is a data inquiry requesting data from the data store related to a business transaction, and wherein the data store accessing system is configured to access the data store by executing a query against the data store to retrieve responsive information responsive to the inquiry (column 3, lines 53-55).

As concerns claim 4, the communication system of claim 2 wherein the business information access request is a status request requesting status of a business transaction, and wherein the data store accessing system is configured to access the data store by executing a query against the data store to retrieve status information responsive to the status request (column 3, lines 50-55).

As concerns claim 5, the communication system of claim 4 wherein the instant messaging component is configured to generate the response as a status response based on the status Information (column 3, line 58).

As concerns claim 6, the communication system of claim 2 wherein the business information access request is a data update request, and wherein the data store accessing system is configured to access the data store by updating the data store based on the data update request (column 10, lines 31-35).

As concerns claim 7, the communication system of claim 6 wherein the data update request is a quote-to-order request, requesting that information in the data store indicative of a quote be updated to be indicative of an order (column 10, lines 36-47, column 19, line 28).

Art Unit: 2151

As concerns claim 8, the communication system of claim 2 and further comprising: an alternate response channel, other than instant messaging, wherein the instant messaging component is configured to generate a response using the alternate response channel (column 12, lines 47-55).

As concerns claim 9, a system for communicating with a remote business, comprising: a user interface component configured to display an indication of the remote business and a plurality of features corresponding to the remote business and receive a user input indicative of a selected feature corresponding to the business information request (column 6, line 64); and an instant messaging component, coupled to the user interface component, configured to receive an indication of the business information request, generate the business information request as an instant message, and transmit the instant message to the remote business (column 3, lines 35-37).

As concerns claim 10, the system of claim 9 wherein the user interface component is configured to display one of the plurality of features as a business transaction status inquiry (column 6, line 65).

As concerns claim 11, the system of claim 9 wherein the user interface component is configured to display one of the plurality of features (column 6, line 65) as a data manipulation feature for manipulating business data at the remote business (column 3, line 10, configures).

As concerns claim 12, the system of claim 11 wherein the data manipulation feature comprises a quote-to-order feature for converting a quote to an order (column 10, lines 36-47, column 19, line 28).

As concerns claim 13, the system of claim 9 wherein the instant messaging component is configured to receive a response instant message from the remote business, responsive to the business information request (column 3, lines 44-46).

As concerns claim 14, the system of claim 13 wherein the user interface component is configured to display (column 6, line 65) the response instant message.

As concerns claim 15, a computer implemented method in a first business of communicating with a second business, comprising: receiving an instant message indicative of a data access operation requested by the second business (column 3, lines 35-37); generating a data store access operation request based on the instant message received (column 3, lines 37-39); and performing the data access operation on a business data store at the first business that stores business data related to the second business (column 3, lines 39-41).

As concerns claim 16, the method of claim 15 and further comprising: sending an instant message to the second business indicative of performance of the data access operation (column 3 lines 44-46).

As concerns claim 17,the method of claim 15 wherein the data access operation comprises an information request and wherein generating a data access operation request comprises: generating a data store query based on the information request (column 3, lines 53-55).

As concerns claim 18. The method of claim 17 wherein performing the data access operation comprises: executing the data store query against the business data store (column 3, lines 53-55).

Art Unit: 2151

As concerns claim 19, the method of claim 15 wherein the data access operation comprises a status inquiry requesting status of a business transaction, and wherein generating a data access operation request comprises: generating a data store query based on the status inquiry (column 3, lines 53-55).

As concerns claim 20, the method of claim 15 wherein the data access operation comprises a data update operation to update data in the business data store, and wherein generating a data access operation request comprises: generating a data store update request based on the data update operation (column 10, lines 31-35).

As concerns claim 21, the method of claim 20 wherein performing the data access operation comprises: executing the data store update request against the business data store (column 10, lines 31-35).

As concerns claim 22, the method of claim 16 and further comprising: sending a responsive communication to the second business through an alternate communication channel (column 12, lines 47-55).

## Response to Arguments

3. Applicant's arguments filed December 20, 2005 have been fully considered but they are not persuasive.

The applicant argues Smith does not disclose "an instant messaging component". The examiner has given the claimed term its broadest reasonable interpretation. Smith discloses messages which are transmitted and received to a user, such that the user is informed immediately (column 2, line 14), thus providing an "instant" message. The applicant has

Page 7

Art Unit: 2151

indicated there are significant differences between a web services approach to allowing customers to search for products and using instant messaging and how they are discussed in the specification. However limitations from the specification are not read into the claims. The claims as presently recited do not specify these significant differences and Smith discloses all of the claimed functions of the "instant messaging component".

### Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Walsh whose telephone number is 571-272-7063. The examiner can normally be reached on Monday-Wednesday from 5:30-4:00.

Art Unit: 2151

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarni Maung can be reached on 571-272-3939. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
